Mas Infosys delivers complete IT infrastructure product solution such as Server, Storage, Hyper Converged , Hybrid IT, Backup Solution , Client computer, Printing solution, Data centre, Server and Client Solution, Network design , Cyber security , IP telephone system , Video conferencing , fire alarm, door access and CCTV system

MAS Infosys®

Mas Infosys Product And Solution

Our mission at Mas Infosys is well known leading Global System Integrator to commit to Deliver Extra Ordinary IT Infrastructure Solutions Design with High Quality Professional Service and Support to the customer to increase the IT efficiency to achieve the business Target.

Server and client solution

Storage and backup solution

Network and security solution

Datacenter solution

Virtualization solution

MAS Infosys®

Tower Solution , Rack Server Solution, Blade Server solution, Workstation, Desktop Computer , Laptop

A server is a high power computer designed to process & execute the requests, deliver data to other client computers over a local network or the internet. Mas Infosys provides Server solution based on Intel Xeon & AMD processors, cloud-enabled enterprise servers and systems that helps customers to operate their business at high speed.

We provide Server Solutions by using HPE, Dell, EMC, Lenovo, cisco & oracle based Servers. A server is a high power computer designed to process & execute the requests, deliver data to other client computers over a local network or the internet. Mas Infosys provides Server solution based on Intel Xeon & AMD processors, cloud-enabled enterprise servers and systems
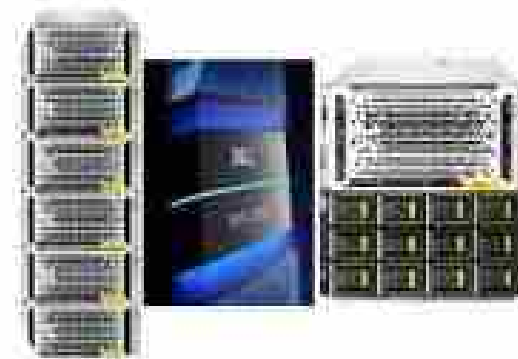

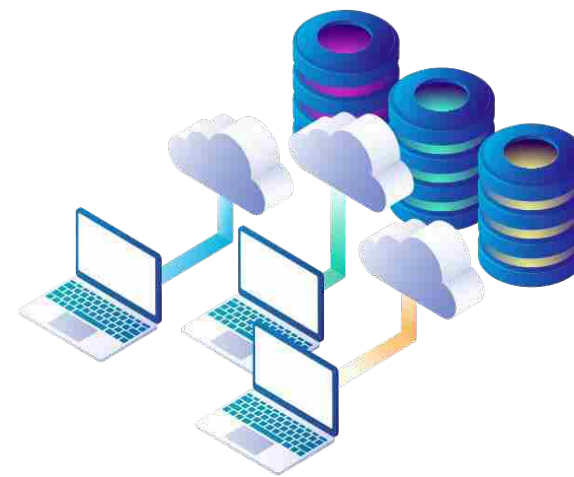

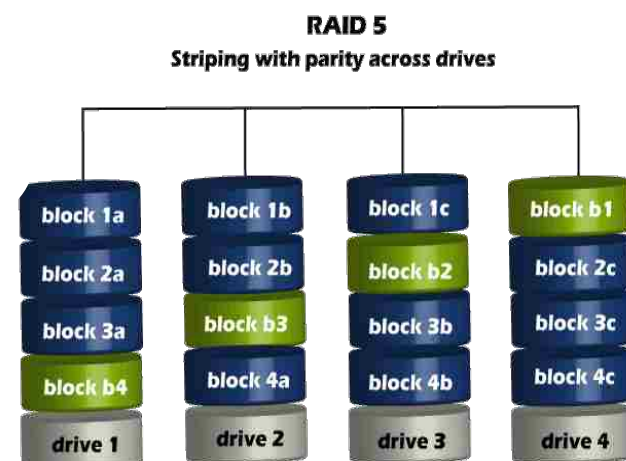

STORAGE, BACKUP & REPLICATION SOLUTION

Mas Infosys specialise in the design and build of complex storage solutions for organizations of all sizes

- A Storage Area Network **(SAN)** is a high-speed Special network that provides multiple servers access to consolidated pools of shared, block-level storage.

- Network-attached storage **(NAS)** is a file-level storage architecture where 1 or more servers with dedicated disks store data and share it with many clients connected to a network.

- Object storage (also known as **object-based storage**) is a computer data storage architecture that manages data as objects, as opposed to other storage architectures like file systems .

NETWORK AND SECURITY SOLUTION

We are risk-oriented and take precautions against potentially malicious attacks, taking into account the instant variability in network security.

Security Solutions	Security Assessment	Security Consulting
IPS/IDS/DDoS/NGFW/NAC/WAF	Network Firewall Audit	IT Audit and Compliance
Endpoint and Mobile Protection	Server System Hardening	✓ ISO 27001 Compliance Audit
Privilege Access Management (PAM)	Email Security Assessment	Security Policy & Procedures
DLP, Email & Sandboxing Solutions	Network/Web Vulnerability Assessment	Data Classification Services
SIEM/UEBA Solutions	IT Risk Assessment	
NTA, NTR and SOAR Solutions	Penetration Test Assessment	Computer Forensics
CASB Solutions	✓ Infrastructure Penetration Test	✓ Network Forensics Analysis
Breach Attack Simulation (BAS)	✓ Web Application Penetration Test	✓ Web Forensics Analysis
Network Packet Broker, TAPS (Visibility)		
Network, Security, Wireless Testing		

MAS Infosys®

THE MARKET WE SERVE

IT solution for all type of industry

Advanced Integration's leading edge AI and HPC products deliver tailored professional solutions for a broad range of industries and applications, such as design , AI, Datacenter and Operates across vertical markets

Smart Cities

HealthCare

Automotive

Finance

Retail

Insurance

HPE SimpliVity 380 with Microsoft Hyper-V

Hewlett Packard Enterprise **Microsoft**

Coffee Coaching

Hyperconverged Infrastructure (HCI) Solutions

Enterprises today are seeking to accelerate innovation and time to market by driving unprecedented resilience, agility and workload consolidation from IT. With an intelligent hyperconverged infrastructure from HPE, all that is now within reach.

CERTIFIED SERVERS FROM HPE

High performance computing is one of the most essential tools fuelling the advancement of computational science and the universe of scientific computing has expanded in all directions. From weather forecasting and energy exploration to computational fluid dynamic and life sciences, researchers and fusing traditional simulations with **artificial intelligence** machine learning, deep learning, big data analytics and also edge-computing to solve the mysteries of world around us

MAS Infosys®

Proliant ML 350 Gen 10 H P E

HPE ProLiant ML350 Gen10 server delivers a secure dual-socket tower server with performance, expandability, and proven reliability making it the choice for expanding SMBs, remote offices of larger businesses, and enterprise data centres. ProLiant ML350 Gen10 leverages the Intel® Xeon® Scalable processors with up to 71%

Proliant RL 300 GEN 11

The new HPE **ProLiant RL300 Gen11** server is the first in a series of servers delivering next-generation compute performance with higher power

EDGE COMPUTING FOR DATA DRIVEN OPERATIONS

Data-enable your customers and employees to be happier and more efficient. Maximize the power of your data to accelerate your digital business, from device to data centre.

Accelerate your business at the edge with data from people, places, and things. Unleash creativity to capture new innovation while reaching the next level of efficiency. Benefit from new insights from data where the action is.

HPE NETWORKING SOLUTIONS

HPE technologies is a leading supplier of end-to-end Ethernet and Infiband intelligent interconnect solutions and services for servers, storage and hyper – converged infrastructure . With HPE business can take advantage of their data centre full potential while reducing total cost of ownership

SWITCHES

Enterprise switches that are purpose-built for cloud, mobile, and IOT.

WIRELESS

Wi-Fi access points and controllers for seamless connectivity and mobility.

HPE STORAGE SOLUTIONS

HPE is a proven leader when it comes to modernizing and simplifying your storage environment. From simple, smart, trusted storage for shared NAS and SAN environments for array built for dedicated, high bandwidth applications like data analytics and disk based backup, the work with Advanced Integration to design the perfect solution.

So when you are ready to go there are latest innovations that we are helping to shape .

Nimble Storage

DELL PowerVault Storage

Power Vault ME4 Series storage arrays deliver all the software you'll need to store, manage, and protect your data, Thin Provisioning: Allocate and consume physical storage capacity as needed in disk pools
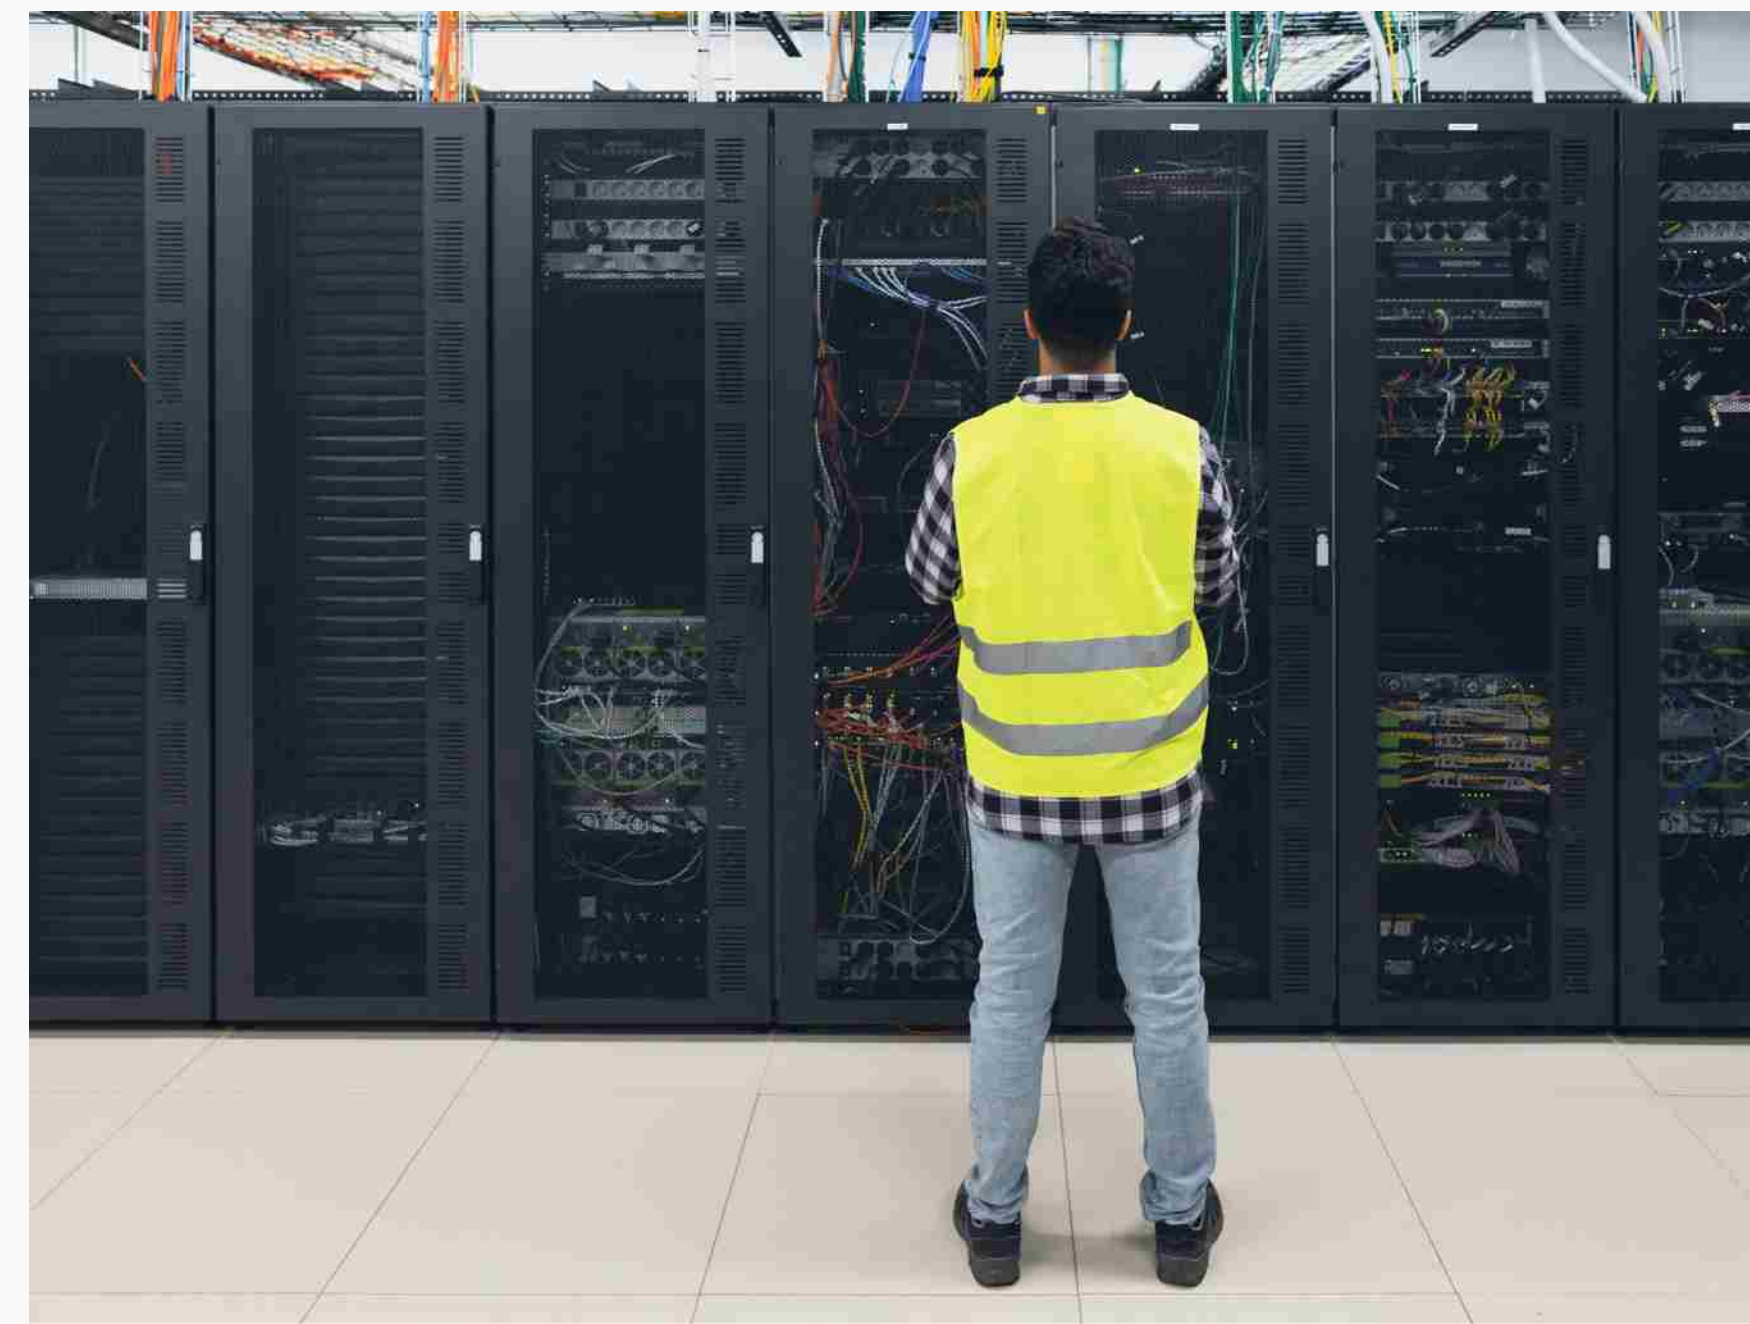

Lenovo Hyper Flash Storage

Experience DM Series superior performance and reduce storage latency up to 50% with NV Me over FC.
